THE THESIS — REAL-ESTATE SAFETY, ACTIVATED UPSIDE

Keep the **risk/reward floor of real estate**, then add two more return layers: **activated, high-paying retreat demand** (up to \$25,000 per guest per week, of which the platform earns a percentage) and an **AI-enabled technology stack** that drives margin and scale. The result is real-estate-grade safety with a materially higher, activated return.

THE PORTFOLIO & THE RAISE

Three Puerto Rico properties have been identified at the \$6–7M level, with a fourth on another Caribbean island and most of the portfolio targeted across the Caribbean. Capital is raised in **\$25M tranches** and deployed with prudent leverage as properties are acquired and activated. The brand is featured at every center as a revenue generator, and HER NEXT MISSION anchors the veteran and first-responder mission — turning real estate into a movement that changes millions of lives.
